

STATEMENTS TO CREATE EXTERNAL HIVE TABLE TO VIEW THRESHOLD DATA

TABLE CREATION

```
create database if not exists health_care;
```

```
use health_care;
```

```
create external table if not exists threshold_reference
```

```
(
```

```
    key            int,  
    attribute      varchar(20),  
    low_age_limit  int,  
    high_age_limit int,  
    low_value      int,  
    high_value     int,  
    alert_flag     int,  
    alert_message  varchar(255)  
)
```

```
row format delimited fields terminated by ',' lines terminated by '\n' stored as textfile;
```

LOADING DATA INTO TABLE

```
load data local inpath '/home/hadoop/threshold_reference.txt' into table threshold_reference;
```

VIEWING DATA

```
select * from threshold_reference;
```
